Lecturer

Dr F Morgan

Timing and Structure

Michaelmas term. 16 Lectures. Assessment: 100% coursework.

Prerequisites

• Near native or advanced level of listening and speaking skills • Be able to read authentic materials in Chinese (using relevant translation tools as appropriate) • Be able to write Chinese characters though the level of competency in this area may not be as high as listening, speaking and reading

Objectives

As specific objectives, by the end of the course students should be able to:

- • To develop and maintain Chinese language competence in all four skills areas and be able to engage in tasks on topics related to science and technology.
- • To explore different genres of writing and develop a more nuanced understanding on the history and culture of the Chinese speaking world.
- • To understand the concept of reflexivity and put it into practice by developing the ability to reflect on their own position and process.
- • To develop sensitivity to others' position and process.
- • To develop awareness of the relational dynamic in a group and their own input.

Content

This course is aimed at heritage and advanced speakers of Chinese who have an advanced or near native level of language competence. The curriculum aims to fulfil two purposes. One is to continue improving language proficiency and cultural knowledge by introducing authentic texts that cover a variety of topics and genres; the other is to introduce the concepts of reflexivity and subjectivity during the language learning process. The aim is to enable learners to develop an awareness of themselves and others hence building the capability to work with differences.

Apart from the study of language items, experiential exercises are introduced to encourage the learners to explore the impact of each topic area on themselves. This is followed by a reflective journal after each session.

Booklists

Please refer to the Booklist for Part IIB Courses for references to this module, this can be found on the associated Moodle course.

Examination Guidelines

Please refer to [Form & conduct of the examinations](#) [2].
